SUMMARY

Backend Engineer specialising in designing, building, and scaling high-performance backend systems and applications. Proficient in JavaScript, Laravel, Node.js, NestJS, with experience in microservices, automation, and multi-server deployments. Skilled in leading projects, optimising high-concurrency systems, and integrating secure payment and fintech infrastructures. Known for delivering scalable, reliable, and production-ready solutions.

EXPERIENCE

Software Application Developer 2023 - 2025
Urbanservicehub - Remote

- Built and owned the backend for a services marketplace – payment flows, auth system, and core domain logic from the ground up.
- Implemented RESTful APIs connecting frontend clients to backend services with clean, well-documented contracts.
- Optimised SQL queries and database schema design, achieving a 30% reduction in query response time.
- Conducted code reviews and enforced engineering standards across the team.
- Collaborated directly with QA and frontend teams to ship reliable, tested features.
- Tech stack: PHP, MYSQL, Javascript.

COO / Lead Engineer 2023 - 2026
Buildhub - Edtech Startup

- Led technical delivery across multiple client projects – from architecture decisions to production deployments.
- Shaped engineering processes and worked directly with founders to ship production software on time.
- Managed a small engineering team across e-commerce platforms, service marketplaces and custom client integrations.
- Tech Stack: NodeJs, PHP.

Chief Technical Officer 2024 - 2026
Tradeet - Ecommerce Startup

- Architected and built the backend infrastructure powering user authentication, product listings, transactions, and marketplace interactions.
- Oversaw system reliability, feature releases, and technical decision-making during the startup's active development phase.
- Architected and built the backend infrastructure powering user authentication, product listings, transactions, and marketplace interactions.
- Tech Stack: NodeJs, NestJS, PHP, Laravel

Freelance Developer 2022 - 2025
Remote

- Built multiple projects across various industries "Ecommerce, Edtech, etc.
- Built high-performance backend systems, API orchestrations, Microservices, etc.

- Designed system solutions to ship production ready software.
- Tech Stack: Node.js, Laravel, NestJS, Javascript.

EDUCATION

ND Computer Science 2021 - 2023
Yaba College of Technology - National Diploma

B.Sc Computer Science 2025 - 2028
National Open University - Bachelor of Science

SKILL

LANGUAGES

Javascript NestJs Node.js PHP

FRAMEWORKS

Laravel Livewire Express Symfony

DATABASES

MySQL PostgreSQL MongoDB

TOOLS

Docker Git PHPUnit Postman Laravel Queues Laravel Horizon Laravel Telescope Redis

APIS

RESTful APIs OpenAI API Webhook Systems Crypto APIs
